

## NOVA-FLEX® 1000 PREMIUM

### NOVA-FLEX 1000 PREMIUM

The Premium 1000 series is a collection of thin, stretchable and opaque PU-films with a matt surface.

Thanks to the self-adhesive polyester liner you will be able to cut small letters and reposition your cut design before pressing. Due to the high washability this film is suitable for workwear.

It can be used on all types of plotters and cutting devices.

- Suitable for cotton, polyester and mixed fabrics
- Nova-Flex Premium 1000 can be layered
- Available in 69 colours
- Washability: up to 95°C (Metallic up to 80°C and Neon colours up to 60°C)
- Material thickness: 90µ

Due to different quality of garments & heat presses, we recommend to test the materials before any application.

For best results we recommend to store the rolls vertically and away from heat, moisture & direct sunlight

Suitable for: 100% cotton, cotton/polyester/acrylic mixtures  
For nylon/hydrophobic garments we recommend the Nylon 3900 series and for sublimated garments we recommend the 4000 Subli-Stop series

Roll sizes:  
500mm x 25m, approx 20" x 27 yds  
other dimensions available on request

Yes, but not on metallic and neon colours.  
However these colours can be transferred on top of all other colours of the 1000 series.

90µm  
3,6 mil

Carrier	PU Hotmelt
	PU Matt face Film
	Pressure Sensitive Adhesive
	Polyester Film 100µm

	155-165 °C = 311-329 °F
	17 - 20 sec.
	3-4 bar ≈ 43-58 psi ≈ 3-4 Kg/cm <sup>2</sup> medium pressure

45°

We recommend to make a cutting test with your plotter before proceeding with production

Hot, warm or cold Peel  
Neon colours always cold peel
